WORK EXPERIENCE

Development Consultant

Freelancing

04/2022 - Present

Achievements/Tasks

- After 13 years of experience as a full-time employee, I was up for a new challenge, so I embarked on the freelancing journey.
- Got up to date with latest Frontend technologies, mainly React and Material UI. Worked on personal projects, in line with my interest in Cloud and Serverless
- architectures. Please check the personal projects section for more details.
- Worked as part-time development consultant.

Head of Development

Endava

01/2019 - 04/2022

Achievements/Tasks

- Coordinated Development Discipline with 10 Discipline Leads and over 400 developers.
- Built 6 technical communities for Java, .NET, Android, iOS, Frontend, Python
- Growed the Discipline from 300 to 400 members
- Doubled Frontend developers.
- Responsible for workforce planning, hiring, juniors intake, technical interviews.
- Involved in presales.

Senior Architect

Endava

05/2018 - 06/2019

Achievements/Tasks

- Coordinated the development effort for the team.
- Created on-boarding procedure for new team members.
- Trained new team members.
- Proposed architectural solutions for serverless AWS and Azure microservices.
- Designed and implemented serverless architecture on AWS and Azure (Azure
- Functions, Azure API Management
- Migrated from serverless to microservices with Azure AKS.
- Implemented and supervised the implementation of several connectors for
- Google, Twitter, Facebook, Postgresql, etc..
- Created code structure and templates according to best practices.
- Developed a strategy to migrate from AWS to Azure.
- Documented application architecture.

Product Architect

SDL

01/2016 - 04/2018

Achievements/Tasks

- Designed the integration of new services.
- Improved availability from 95 to 99.
- Migrated from ANT to MAVEN and built Jenkins pipelines.
- Implemented monitoring using ELK stack.
- Provided support for the adoption of APM tool.
- Automated release process and increased test coverage with 20% on unit tests and 50% on e2e tests.
- Provided support to migrate from on-prem to AWS.
 - Split the monolith and worked to containerize the application using Docker/
- Kubernetes developed demo projects based on Spring Boot/Kafka/ ElasticSearch /Redis, etc.
- Collaborated closely with different stakeholders from PM, PO, Dev Manager, DEV QA to OPS and Professional Support.

PERSONAL PROJECTS

Billy (04/2022 - Present)

Github Repo

Created an application for expenses and bills analytics, which collects, processes and

- analyzesbank statements, providing a general view on your expenses. It generates reports that show how muchyou spend on food, travel, etc.
- Extracted data from pdf bank statements using tabula and pandas.
- Implemented low cost search engine based on pandas, caching data stored in S3.
- Created end to end CI/CD pipeline using CodePipeline and CodeBuild.
- Integrated Cognito for user authentication and authorization.
- Implemented event driven architecture with DynamoDB streams, SNS topics and SQS
- Implemented serverless architecture using Lambdas and SAM.
- Implemented DynamoDB single table design.
- Deployed React frontend on S3, CloudFront and Route53

Hodor (04/2022 - Present)

Github Repo

- Created an authentication and authorization service based on AuthLib to generate JWTs.
- Integrated Google authentication.

Python OAuthLib JWT Postgres Kubernetes Docker

Technical Lead

SDL

01/2014 - 01/2016

Achievements/Tasks

- Designed and implemented REST APIs from scratch.
- Worked closely on the integration and adoption of Spring stack: DI, REST, MVC, AOP, JPA (Hibernate).
- Lead the adoption of QueryDSL and migrated from Java 6 to Java 8, from Tomcat 7 to Tomcat 8.
- Fixed critical outages and performance issues.
- Provided continuous support for OPS, DEV and Professional Services and outstanding technical support to clients.

Software Developer

SDL

01/2013 - 01/2014

Achievements/Tasks

Worked on world leading translation software. The application offered both

- translation and translation projects management capabilities, being used by top companies over the world.
- Implemented new features.
- Provided maintenance on a large Enterprise product.
- Introduced new libraries.
- Started working on application refresh.

Documented the application after KT and helped with the on boarding process for new comers.

Software Engineer

HP

10/2009 - 01/2013

Achievements/Tasks

Developed and worked on dozens of integrations (Active Driectory, OpenStack,

- Exchange, Powershell, SCVMM, EC2, VMWARE, etc.) in a product used to orchestrate datacenter operations. The integrations were developed in Java/C#.
- Migrated build from ANT to Maven.
- Developed key integrations.
- Fixed critical issues for major clients.

EDUCATION

Computer Science

Technical University of Cluj-Napoca

09/2004 - 07/2009Cluj-Napoca

Computer Science

Tiberiu Popovici High Scool

09/2000 - 07/2004Cluj-Napoca

My Resume (04/2022 - Present)

Github Repo

- Created a simple React app to expose my resume.
- Deployed React frontend on S3, CloudFront and Route53.

React Material UI AWS S3 CloudFront SAM Route53 Lambda
Github Actions

Development Discipline Tools (06/2019 - 12/2021)

- Extracted complex data from salary review Excel files.
- Created reports and dashboards from salary review data.
- Extracted workforce planning data from internal tools.
- Created reports from workforce planning tool.
- Created development skills report.

Lorem Ipsum (10/2009 - Present)

content to be used elsewhere.

Github Repo

- Created an application used as a technical playground to prove architectural concepts. Implemented a simple text generator, useful to generate books and get some random
- Implemented hexagonal architecture in Python.
- Worked using best engineering practices including TDD, CI/CD, OAuth, etc.
- Implemented JWT authentication and authorization.
- Implemented a simple search engine to get stats from generated text. e.g. # of unique numbers.
- Deployed the app on local Kubernetes, AWS ECS and AWS EKS.
- Implemented frontend using React and Bootstrap.
